WHO ARE WE?

The Emerging Minds Research Network is funded by UK Research & Innovation (UKRI) to facilitate research that has the potential to reduce the prevalence of mental health problems among children and young people.

Our focus is on prevention, mental health promotion, and early treatment. By working across sectors and disciplines, we hope to bring together a diverse range of people interested in mental health research and to work to tackle our four research challenges.
We’ve prioritised 4 research challenges that can be addressed by cross disciplinary and cross-sector research.

These research challenges were developed on the basis of consultation with young people, families, practitioners, and policy makers; in partnership with Young Minds and the Centre for Mental Health.

They all focus on improving mental health promotion, prevention and early treatment to reduce the prevalence of mental health problems experienced by children and young people.

emergingminds.org.uk/research
EMERGING MINDS IN NUMBERS
OUR PROGRESS SO FAR (NOVEMBER 2021)

NETWORK BUILDING
- 2009 mailing list subscribers
- 5891 Twitter followers
- 13 kick off events
- 362 kick off event attendees
- 339 Early Career Researchers (ECRs) on our mailing list

OUTPUTS
- 9 funded projects
- 3 funded cross-sector placements
- 15 podcast episodes
- 24 newsletters
- 20 Special Interest Research Groups
WHO ARE OUR MEMBERS?

In October 2020, we asked our newsletter subscribers to tell us about their experiences of Emerging Minds

We wanted to understand who had been getting involved with Emerging Minds. This is what our members told us about their roles:

![Bar chart showing the number of subscribers by role.](chart.png)

- Academic: 500
- Clinician/practitioner: 400
- Early Career Researcher: 300
- Educator: 200
- Parent/family member: 100
- Policy maker: 50
- Third Sector Professional: 50
- Young Person: 50
- Other: 50

Number of subscribers
We also asked our newsletter subscribers how they had engaged with us:

- Read newsletter: 29.8%
- Applied for funding: 6.6%
- Followed on social media: 23.8%
- Accessed resources/recordings: 16.6%
- Attended event/webinar: 23.2%

We have been delighted by the positive feedback we have received about our monthly newsletter. It has been a key part of how we have built our network, allowing us to maximise engagement with the opportunities we have provided as well as wider opportunities for training, funding, and collaboration.

“Just wanted to say that your emerging mind network newsletter is bloody brilliant! I rarely read newsletters in the general business of things – but yours is fab. V impressed : - )“

Newsletter subscriber
MEMBERS’ VIEWS

Here are the most frequent keywords that mailing subscribers used when asked:

What has been most useful about Emerging Minds so far?

Networking  Resources
Funding      ECR support
Friendly team

Mailing subscribers were also asked:

What is your overall impression of us?

Good team  Research
Effective   Network
Useful      Opportunities

Most members stated that they would recommend the Emerging Minds Network to those interested in research for children and young people’s mental health.
As well as working closely with young people with lived experience expertise, parents and carers have made an essential contribution to all our projects, for example, as advisers and reviewers.

We have been very grateful for their ideas, detailed feedback, and advice for researchers at every stage of our work.

“I knew it was important that researchers learned from parents like myself with lived experience but I didn’t realise how much I would learn and where that learning would take me.

The welcome into the world of research was warm, inclusive and filled with curiosity; inspiring me to start a Doctorate focusing on Mental Health and Coproduction!“

Kirstin Eccles, Emerging Minds Parent/Carer Advisor
The Emerging Minds Network has been supporting Early Career Researchers (ECRs) with 3 funded cross-sector placements so far. We have some stories to share from those who took part and their hosts.

**Evaluating projects designed to alleviate mental health inequalities**

“*My Emerging Minds placement with the Centre for Mental Health gave me opportunities to meet and work with many people addressing mental health topics from different perspectives and backgrounds outside of academia.*

*I was trained in qualitative research methods and developed new research questions that I’m excited to pursue in collaboration with the charity.*“

Dr Yasmin Ahmadzadeh, Kings College London
“The Emerging Minds cross-sector placement scheme played a pivotal role in developing Embracing Complexity’s research arm. Suzi’s hard work and insights have been absolutely invaluable, and I’m hopeful that her forthcoming report will kickstart a much-needed conversation on how we fund research across diagnostic boundaries.”

Georgia Harper, Embracing Complexity Coalition

“Participating in the cross-sector scheme has been invaluable to my development as an ECR. It enabled me to work closely with Embracing Complexity, benefitting from their wealth of skills and experience, particularly regarding maximising the impact of research to policy and practice. Our collaboration is ongoing – additional funding was awarded to conduct further research and from Emerging Minds to establish a special interest research group – which would not have happened without the scheme.”

Dr Suzi Sapiets, Universities of Warwick & Kent
“The placement has opened up new opportunities in a really meaningful area of research to me – supporting young people who have experienced emotional abuse and neglect. I was given both autonomy and support to configure the project, develop new research skills and methods and work together with the NSPCC and Childline teams. Working in this collaborative way with a 3rd-sector organisation who really embraced involving young people (NeurOX Young People’s Advisory Group) in research co-production was really important for me. The young co-researchers also grew in confidence and capabilities throughout the project and described several benefits, for example: “I enjoyed feeling that I had made a difference and helped improve the service” . I feel there were valuable outputs for all and the findings will help to inform further support for these young people and research in this area.”

Vanessa Bennett, University of Oxford
“The NSPCC was fortunate to be one of the organisations to have an Early Career Researcher placement through Emerging Minds. The value of this placement has gone beyond the original three month project for all involved. The researcher involved young researchers in the project, which brought added depth and value. In addition to the outputs of the research project itself, this project showed that it is possible to involve young people as researchers in a meaningful way and that their involvement brings clear benefits to the research findings.“

Pam Miller, NSPCC

And there’s more to come …

Cross-sector placement in 2022
Coming soon!
FUNDING CALL APPLICATIONS

Our first funding call invited research proposals to address 3 of our research challenges: **Embracing Complexity**, **Supporting the Supporters** and **Voices, Power & Attitudes**. This funding call closed to applications in February 2020.

Our second funding call focused specifically on our **Voices, Power & Attitudes** research challenge and closed for applications in June 2021.

- **83% of bids had ECRs within the team**
- **51% of bids had an ECR as the lead applicant**
- **63% of bids had multi-disciplinary involvement**
Funded Projects from Our First Funding Call

Dr Emma Berry - Queens University Belfast
Social Media and Psychological Wellbeing in Young People with Type 1 diabetes: A Stakeholder Engagement Study

Dr Lucy Biddle - University of Bristol
Defining delivery of the 'Step by Step' intervention for schools: a co-production project

Dr Charlotte Hall - University of Nottingham
Waiting for Access into Treatment 'WAIT' study: an exploration of current interventions offered to children and young people on CAMHS waiting lists
Dr Faith Martin - Coventry University
Developing web-based support for parents of children who self-harm

Emma Soneson - University of Cambridge
Can an online teacher training programme improve identification of mental health difficulties in primary school children? A feasibility study

Dr Emily Stapley, University College London & Dr Daniel Hayes, Anna Freud Centre
Developing social prescribing to improve mental health and wellbeing for children and young people
The **Voices, Power & Attitudes** research challenge was identified as a priority in our original consultation workshops with stakeholders, however we did not fund any projects that addressed this challenge in our first funding call. In response we focused a specific funding call on this challenge in 2021.

We focused on the following questions:

- What is the **impact** of racism on the mental health of children & young people in the UK?
- What **interventions** will be effective in addressing racism in ways that will benefit children & young people’s mental health?

We recruited an intern **Fiyory Ghezae** and two advisors: **Adenike Adebiyi** and **Jawwad Mustafa** to help us develop this funding call.

Fiyory carried out a rapid scoping review of existing published research focused on the impact of racism on children and young people’s mental health in the UK.

Fiyory, Nikki and Jawwad also hosted a priority setting workshop with young people aged 16-24 years with lived experience of racism and/or mental health difficulties in January 2021. This was followed by a priority setting workshop with those who support young people who experience racism.

We are very proud that Fiyory, Nikki and Jawwad also published a commentary on the Department of Health and Social Care mental health research goals as part of their work, as well as a piece for the journal Lancet Psychiatry which is due to be released soon.

[emergingminds.org.uk/voices-power-attitudes](http://emergingminds.org.uk/voices-power-attitudes)
We launched our second funding call on Voices, Power & Attitudes in March 2021 and received 9 applications. We awarded a total of £70,000 of funding to 3 research teams:

Dr Yasmin Ahmadzadeh, Kings College London
TRADE: Transmission of experiences of Racism, Anxiety and DEpression in families

Dr Verity Jones & Team, University of West of England
Improving well-being and mental health relating to racism in 10-11 year olds: a Bristol case study

Dr Shioma-lei Craythorne, Aston University
Understanding young people’s experiences of racially motivated appearance focused (RMAF) bullying.

“My time at Emerging Minds has been invaluable. I applied for the intern role hoping to gain more experience in research as I wanted to do a PhD and it exceeded my expectations. I’ve learnt so much and it’s helped open doors and build my confidence as a young researcher."

Fiyory Ghezae, previous Emerging Minds Intern, current PhD student at Oxford Brookes University
“It has been an honour to work with the Emerging Minds Network. I have enjoyed having access to wonderful opportunities, including getting published in an academic journal, facilitating workshops and giving presentations, as well as being part of an interview and application review panel alongside a lovely team.”

Nikki Adebiyi, Emerging Minds Advisor

We are deeply grateful to Conor, Ronni and Selorm for their visual responses to our priority setting workshop.

To check out their work or follow them on Instagram:

Conor: @conorofficiel
Ronni: @projectrnz
Selorm: @selorm.official
Following the outbreak of the COVID-19 pandemic, we worked with various partner organisations to respond to the global situation.

Emerging Minds supported the set up and launch of the UKRI and Westminster Foundation funded Co-SPACE study which has aimed to understand how families have been coping during the pandemic and to find out what kind of support would be most helpful.

Emerging Minds also supported a Medical Research Council and Westminster Foundation funded knowledge mobilisation project, Co-RAY.

The CoRAY project is focused on making sense of what research says about how the mental health of young people aged 11 – 16 years has been affected by the pandemic.

Through the CoRAY project we are working with young people and partners, including Headliners (UK), Fully Focused Productions, BBC Bitesize, the University of Reading Design School, Young Minds, and the TRIUMPH network, to develop resources to address young people’s mental health priorities in the pandemic context and beyond.
We secured additional public engagement in research seed funding from the University of Oxford enabling us to work with Debating Mental Health and Didcot Girls School to enable a group of 13 and 14 year olds to develop and share their views on whether we can build a mentally healthier world as we live through and emerge from the COVID-19 pandemic. The final debate was held virtually in December 2020 and attended by over 40 people including representatives from local and national charity and community sector organisations, researchers, students, school staff and council representatives.

Young people participating in the programme, reported feeling more confident to share their views in public and more knowledgeable about mental health topics.
“I don’t usually consider talking about my views that much but after this programme I am determined to do so.”

Programme participant

‘Their understanding of the impact of COVID on people’s mental health and what is needed to support this moving forward is heartwarming and offers hope for a more mentally healthy world.’

Final event audience member

We worked with Fully Focused Productions to produce short films to share the young people’s views and prompt further discussion amongst members of the network.

emergingminds.org.uk/debating-mental-health-project-report

The perspectives of young people who took part in our Debating Mental Health event were included in a report published by The All-Party Parliamentary Group on a Fit and Healthy Childhood and MQ titled The COVID generation: A mental health pandemic in the making. This report made a number of recommendations for policy makers for addressing the mental health needs of children and young people during the pandemic and beyond.
In March 2020, we released an evidence-based resource on ‘Supporting children and young people with worries about COVID-19’ for parents of children aged 5-16.

This was authored by researchers and clinicians at the TOPIc research group (University of Oxford) and the AnDY research clinic (University of Reading).

With support from international partners, we were able to share 16 translations of this resource, Afrikaans, Arabic, Chinese, Farsi, Finnish, French, German, Greek, Japanese, Polish, Portuguese, Romanian, Slovenian, Spanish, Thai, Turkish as well as versions for Ireland and for parents and carers of children aged 2-4 years old.

These resources have so far been viewed over 16,000 times.

To download the resource, visit: emergingminds.org.uk/parent-carer-covid-19-resource
We jointly hosted a virtual conference with the Centre for Society & Mental Health and the Policy Institute at Kings College London, along with the Mental Elf.

The conference, ran over 3 days, focused on the question of ‘Youth Mental Health & COVID-19: What do we know and what can we do?’ Participants in the conference included young people, parents/carers, practitioners, clinicians, third sector organisations, and researchers. The proceedings have been viewed by over 1500 people so far.

The event culminated in a Policy lab, facilitated by the Policy Institute at Kings College London, which enabled stakeholders to respond to the evidence presented at the conference. The recommendations of this policy lab have now been shared on our website.
Young people presented at the conference, took part in the policy lab, and also supported the dissemination of the evidence presented at the sessions through writing blogs and producing powerful illustrations of topics discussed.

@selorm.official

emergingminds.org.uk/youthmentalhealthandcovid19
Over spring and summer 2020, we hosted a COVID-19 webinar series for anyone supporting children and young people, in partnership with the Mental Elf. We invited researchers and clinicians to share what research can tell us about the following topics:

**Living through Lockdown**
- Dr Maria Loades, University of Bath
- Prof Shirley Reynolds, University of Reading

**Teens, Screens & Quarantines**
- Dr Amy Orben, University of Cambridge
- Dr Peter Etchells, Bath Spa University

**Autism in Quarantine**
- Prof Jonathan Green, University of Manchester
- Dr James Cusack, Autistica

**Supporting Children & Young People who Self-Harm**
- Prof Ann John, Swansea University
- Dr Faraz Mughal, Keele University
Our COVID-19 podcast series was both free and popular, receiving over 8000 views in total. Recordings continue to be available on the Mental Elf Youtube channel and can be accessed via the Emerging Minds website:
https://emergingminds.org.uk/podcast
An important piece of feedback from our members’ survey was that respondents were keen for further opportunities for networking and connections with people interested in child and young people’s mental health.

In response to this, we launched our Special Interest Research Groups (SIRGs).

Each group is open to all. The coordinating teams bring together researchers in academic settings, people with relevant lived experience, colleagues from the voluntary and community sector, clinicians, and other key stakeholders. Each group was awarded £1500 to support involvement of young people and/or parents/carers with lived experience expertise.

For more info or to join a SIRG, visit emergingminds.org.uk/join-a-sirg
“It’s been such a pleasure to work with Emerging Minds and the other Special Interest Research Groups over the past year. Whilst working on the development of our own Adolescent Depression Network to Consolidate Expertise (ADvaNCE), Emerging Minds have provided us with support and training throughout the experience. Of particular help was the opportunity to liaise with other funded networks, to learn from their experiences, and to feel reassured by shared difficulties.”

Dr Faith Orchard, ADvaNCE Network
Being Seen and Heard: Identifying the research priorities for children affected by parental mental illness
Dr Louise Dalton, University of Oxford

Improved Access to Treatment Choices for Children & Young People with Multisensory Hallucinations
Dr Sarah Parry, Manchester Metropolitan University

Eating Disorder Health Integration Team’s (EDHIT) Young Voices
Dr Helen Malson, University of the West of England

Empowering Young People to take Responsibility for their own Mental Health
Dave McPartlan, University of Cumbria
Language and Communication Needs in Mental Health

EARLY CAREER RESEARCHERS

An important part of our mission is to support the development of Early Career Researchers (ECRs), including through working together with our fellow UKRI funded mental health research networks.

17% of subscribers to our mailing list identified themselves as ECRs as of November 2021.

We have regularly sought feedback from ECRs about what they would find useful and how they would like to be involved in the network. We have held a number of events to bring together ECRs and to support their professional development.

- 3 Proposal Development workshops
- 1 Research Challenges workshop
- 3 Early Career Researcher workshops
- November & December 2020 Advice for ECRs webinar series
- 3 Cross-sector Placements (1 more on the way!)
- 3 Emerging Minds internships
Professor James Stark (Professor of Medical Humanities, University of Leeds) hosted a workshop at the Mental Health Museum in January 2020. 23 post graduate and Early Career Researchers from a range of disciplines and members of the McPin Foundation’s young people’s network joined this session to focus on interdisciplinary approaches to mental health research.

In summer 2021, we hosted Keili Koppel, a Design Researcher as our Emerging Minds Design Research & Practice intern.

“I am grateful to have had the chance to work with Emerging Minds Network over the past three months, especially for the opportunity to make new connections, develop research skills and build a good understanding of an emergent research area - design for children and young people’s mental health. It has been a great learning experience and has led me to other research roles.“

Keili Koppel, Design Researcher & previous Emerging Minds Intern
UPCOMING PROJECTS

As we head into our final year of funding from UKRI, we have a number of exciting projects to build upon our successes so far.

We are particularly keen to help stakeholders build connections across sectors, a key area of feedback from our mid-point survey.

Check out the exciting plans we have ahead!

We are delighted to launch our new Emerging Minds Open Lab meeting series!

As per the name, this meeting series is ‘open’ to all network members, but is particularly useful to Early Career Researchers (ECRs).

The aim is to provide a friendly and informal space to allow regular participants a chance to get to know each other and form useful connections. This again builds on the feedback from our members survey which indicated a strong desire for building greater network connections.

We are hosting monthly Zoom meetings on a variety of topics, including: perinatal and infant mental health, design & mental health research, and racism & youth mental health.
Why even when we know ‘what works’ isn’t this necessarily implemented in policy and practice?

How do we improve evidence-based decision making? E.g.:

How can we successfully inform commissioning decisions and policy making and how can we ultimately increase implementation of research into practice?

Our third funding call opened in Autumn 2021, focusing on our ‘Big Question Research Challenge’.

We aim to encourage and support our network to answer the following research questions:

- Why even when we know ‘what works’ isn’t this necessarily implemented in policy and practice?
- How do we improve evidence-based decision making? E.g.: How can we successfully inform commissioning decisions and policy making and how can we ultimately increase implementation of research into practice?

Our Emerging Minds intern, Abi Thomson, carried out a rapid scoping review of the barriers and facilitators of community-based implementation of research to address mental health promotion, prevention, and treatment for children and young people. She worked with two fantastic advisors, Nimrah and Georgia, to facilitate various workshops with parents and young people to help develop the funding call.
Emerging Minds have always been a network that I’ve admired, and being a part of it was an exciting opportunity that I’m grateful for at such an early stage in my career. The experiences offered throughout the internship were diverse and equipped me with a broad range of skills to take forward into future roles.

What set this role apart was being trusted to lead and take decisive actions in preparation for the funding call. This is something I valued and enjoyed and which has vastly increased my confidence moving forwards. I was also able to make a broad range of connections with others in the field which was hugely appreciated for someone at such an early stage in their career.

The team are very supportive and friendly and I found it easy to connect despite the internship being wholly virtual. I can’t thank them enough for giving me the chance to work on this project and be a part of the Emerging Minds team."

Abigail Thomson, former Emerging Minds Intern and Research Assistant
We are supporting a fourth placement for an Early Career Researcher, hosted by Shout 85258/ Mental Health Innovations.

Shout 85258, the first service from Mental Health Innovations (MHI), is the UK’s first, free, 24/7 crisis text support service.

The aim of this placement is to better understand conversations that refer to thoughts about suicide and, in particular, what features of conversations lead to a de-escalation and/or the texter safety planning, including what coping strategies the texter may agree to use.

We anticipate that the findings will help MHI enhance the training and support they give volunteers about these types of conversations. In addition, we hope that the project will generate findings of broad interest to those working in suicide prevention.
Grow
Researcher Development Programme

emergingminds.org.uk/grow

We are just about to launch a new professional development programme for Early Career Researchers in response to feedback from ECRs in our members’ survey. This will run from January – July 2022 and will:

- Develop a network of post-PhD Early Career Researchers focused on children & young people’s mental health, who can support each other in 2022 and beyond the life of the network.
- Support the professional development of participating researchers to work towards and achieve their professional goals
- Support participating researchers to develop the networks, skills and experience to work across sectors and disciplines to make a difference to children & young people’s mental health.
WHO WE ARE

Leadership Team

**Professor Cathy Creswell**, University of Oxford - Principal Investigator

**Emily Lloyd**, University of Oxford - Network Manager

**Andre Tomlin**, Founder & Director, National Elf Service

**Pam Miller**, Associate Head of Research, NSPCC

**Kadra Abdinasir**, Associate Director of Children and Young People’s Mental Health, Centre for Mental Health

**Professor Sue Walker**, Professor of Typography & Graphic Communication, University of Reading

**Professor Sarah Halligan**, Professor of Child and Family Mental Health, University of Bath

**Professor James Stark**, Professor Medical Humanities, University of Leeds

**Professor Chris Bonnell**, Professor of Public Health Sociology, London School of Hygiene & Tropical Medicine

**Professor Caroline Jay**, Professor of Computer Science, University of Manchester

**Professor Ann John**, Professor of Psychiatry & Public Health, Swansea University

**Professor Deborah Chambers**, Professor of Media and Communication, Newcastle University

**Dr Jen Martin**, Senior Programme Manager, NIHR MindTech/MedTech Co-operative

**Emma Thomas**, CEO of Young Minds
Advisory Group

We are grateful for the hard work and dedication of all of our brilliant advisory group, particularly the young people and parents/carers who bring their lived experience expertise.

To find out more about them, visit our website:

emergingminds.org.uk/team
Emerging Minds is part of the Cross-Disciplinary Mental Health Network Plus initiative supported by UK Research and Innovation. We are grateful to them for our funding and also to the following organisations who collaborated to establish the Emerging Minds Network.
